Software Engineering for Embedded Systems: Chapter 19. Intellectual Property Pete Wilson
Intellectual property normally means one of two things – the patents or other legal protections you have accumulated to protect your inventions, or the inventions and designs themselves. So we may talk about "licensing one's intellectual property", and mean either selling a license to someone to make use of your patented ideas, or selling a license to build, distribute or use a product, as ARM does with its processor and other designs or a tools company does with its compiler and OS products. In this chapter, we will be concentrating more on the first meaning – dealing with the legal protections around your work – and we will be covering the basics in two major sections, one covering the issues surrounding what you need to do to be sure that you actually do own that software that you wrote or bought, what you need to do when selling it or licensing it to others, including the role of "open software"; and the other covering the various protections you can obtain for your software and any valuable inventions in it.

From reader reviews:

James Barclay:

Here thing why this particular Software Engineering for Embedded Systems: Chapter 19. Intellectual Property are different and reputable to be yours. First of all looking at a book is good nevertheless it depends in the content of the usb ports which is the content is as delightful as food or not. Software Engineering for Embedded Systems: Chapter 19. Intellectual Property giving you information deeper and in different ways, you can find any e-book out there but there is no e-book that similar with Software Engineering for Embedded Systems: Chapter 19. Intellectual Property. It gives you thrill studying journey, its open up your eyes about the thing that happened in the world which is possibly can be happened around you. It is easy to bring everywhere like in park, café, or even in your technique home by train. Should you be having difficulties in bringing the published book maybe the form of Software Engineering for Embedded Systems: Chapter 19. Intellectual Property in e-book can be your substitute.

Robert Hensley:

Information is provisions for those to get better life, information nowadays can get by anyone on everywhere. The information can be a know-how or any news even a huge concern. What people must be consider when those information which is in the former life are difficult to be find than now's taking seriously which one would work to believe or which one the resource are convinced. If you have the unstable resource then you get it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Software Engineering for Embedded Systems: Chapter 19. Intellectual Property as the daily resource information.

Rose Taylor:

People live in this new morning of lifestyle always make an effort to and must have the time or they will get lot of stress from both day to day life and work. So , if we ask do people have time, we will say absolutely of course. People is human not only a robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer may unlimited right. Then ever try this one, reading ebooks. It can be your alternative within spending your spare time, the particular book you have read is definitely Software Engineering for Embedded Systems: Chapter 19. Intellectual Property.

Virginia Johnson:

As a pupil exactly feel bored to be able to reading. If their teacher inquired them to go to the library or make summary for some e-book, they are complained. Just little students that has reading's soul or real their leisure activity. They just do what the professor want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach

Chinese's country. Therefore , this Software Engineering for Embedded Systems: Chapter 19. Intellectual Property can make you experience more interested to read.
