Kim-Hui Yap, Ling Guan, Stuart William Perry, Hau San Wong

Adaptive Image Processing: A Computational Intelligence Perspective, Second Edition (Image Processing Series) Kim-Hui Yap, Ling Guan, Stuart William Perry, Hau San Wong

Illustrating essential aspects of adaptive image processing from a computational intelligence viewpoint, the second edition of **Adaptive Image Processing: A Computational Intelligence Perspective** provides an authoritative and detailed account of computational intelligence (CI) methods and algorithms for adaptive image processing in regularization, edge detection, and early vision.

With three new chapters and updated information throughout, the new edition of this popular reference includes substantial new material that focuses on applications of advanced CI techniques in image processing applications. It introduces new concepts and frameworks that demonstrate how neural networks, support vector machines, fuzzy logic, and evolutionary algorithms can be used to address new challenges in image processing, including low-level image processing, visual content analysis, feature extraction, and pattern recognition.

Emphasizing developments in state-of-the-art CI techniques, such as content-based image retrieval, this book continues to provide educators, students, researchers, engineers, and technical managers in visual information processing with the up-to-date understanding required to address contemporary challenges in image content processing and analysis.

From reader reviews:

Kathy Wilson:

This book untitled Adaptive Image Processing: A Computational Intelligence Perspective, Second Edition (Image Processing Series) to be one of several books in which best seller in this year, that is because when you read this publication you can get a lot of benefit in it. You will easily to buy this kind of book in the book store or you can order it by way of online. The publisher in this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Mobile phone. So there is no reason to your account to past this reserve from your list.

Joe Lowe:

Reading a e-book can be one of a lot of activity that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new info. When you read a publication you will get new information because book is one of numerous ways to share the information or their idea. Second, looking at a book will make a person more imaginative. When you reading a book especially tale fantasy book the author will bring you to imagine the story how the personas do it anything. Third, you are able to share your knowledge to others. When you read this Adaptive Image Processing: A Computational Intelligence Perspective, Second Edition (Image Processing Series), it is possible to tells your family, friends and also soon about yours e-book. Your knowledge can inspire others, make them reading a reserve.

Treva Ritter:

Adaptive Image Processing: A Computational Intelligence Perspective, Second Edition (Image Processing Series) can be one of your starter books that are good idea. We all recommend that straight away because this guide has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining but delivering the information. The author giving his/her effort to put every word into satisfaction arrangement in writing Adaptive Image Processing: A Computational Intelligence Perspective, Second Edition (Image Processing Series) however doesn't forget the main position, giving the reader the hottest along with based confirm resource information that maybe you can be certainly one of it. This great information can easily drawn you into completely new stage of crucial contemplating.

Brent Campbell:

What is your hobby? Have you heard which question when you got pupils? We believe that that concern was given by teacher to the students. Many kinds of hobby, All people has different hobby. So you know that little person such as reading or as examining become their hobby. You need to know that reading is very important and also book as to be the matter. Book is important thing to add you knowledge, except your own teacher or lecturer. You will find good news or update with regards to something by book. A substantial

number of sorts of books that can you decide to try be your object. One of them are these claims Adaptive Image Processing: A Computational Intelligence Perspective, Second Edition (Image Processing Series).
