Claudio Canuto, Anita Tabacco

Mathematical Analysis II (UNITEXT / La Matematica per il 3+2) Claudio Canuto, Anita Tabacco
The purpose of the volume is to provide a support textbook for a second lecture course on Mathematical Analysis. The contents are organised to suit, in particular, students of Engineering, Computer Science and Physics, all areas in which mathematical tools play a crucial role. The basic notions and methods concerning integral and differential calculus for multivariable functions, series of functions and ordinary differential equations are presented in a manner that elicits critical reading and prompts a hands-on approach to concrete applications. The pedagogical layout echoes the one used in the companion text Mathematical Analysis I. The book’s structure has a specifically-designed modular nature, which allows for great flexibility in the preparation of a lecture course on Mathematical Analysis. The style privileges clarity in the exposition and a linear progression through the theory. The material is organised on two levels. The first, reflected in this book, allows students to grasp the essential ideas, familiarise with the corresponding key techniques and find the proofs of the main results. The second level enables the strongly motivated reader to explore further into the subject, by studying also the material contained in the appendices. Definitions are enriched by many examples, which illustrate the properties discussed. A host of solved exercises complete the text, at least half of which guide the reader to the solution. This new edition features additional material with the aim of matching the widest range of educational choices for a second course of Mathematical Analysis.

From reader reviews:

Sharon Garon:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each book has different aim or perhaps goal; it means that reserve has different type. Some people really feel enjoy to spend their time and energy to read a book. They can be reading whatever they have because their hobby is definitely reading a book. Why not the person who don't like studying a book? Sometime, man or woman feel need book if they found difficult problem or maybe exercise. Well, probably you'll have this Mathematical Analysis II (UNITEXT / La Matematica per il 3+2).

David McKenney:

Reading a e-book can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a publication will give you a lot of new details. When you read a guide you will get new information since book is one of many ways to share the information or maybe their idea. Second, reading a book will make anyone more imaginative. When you examining a book especially tale fantasy book the author will bring someone to imagine the story how the figures do it anything. Third, you are able to share your knowledge to other folks. When you read this Mathematical Analysis II (UNITEXT / La Matematica per il 3+2), you may tells your family, friends and also soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a book.

Gregory McKinney:

Playing with family in a very park, coming to see the sea world or hanging out with buddies is thing that usually you will have done when you have spare time, and then why you don't try point that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Mathematical Analysis II (UNITEXT / La Matematica per il 3+2), you can enjoy both. It is excellent combination right, you still want to miss it? What kind of hang-out type is it? Oh can happen its mind hangout fellas. What? Still don't obtain it, oh come on its referred to as reading friends.

Damian Woodward:

Is it a person who having spare time subsequently spend it whole day by simply watching television programs or just resting on the bed? Do you need something totally new? This Mathematical Analysis II (UNITEXT / La Matematica per il 3+2) can be the respond to, oh how comes? A book you know. You are and so out of date, spending your free time by reading in this completely new era is common not a nerd activity. So what these guides have than the others?
