Metin Bektas

Math Shorts - Introduction to Differential Equations Metin Bektas
Differential equations are an important and fascinating part of mathematics with numerous applications in almost all fields of science. This book is a gentle introduction to the rich world of differential equations filled with no-nonsense explanations, step-by-step calculations and application-focused examples. College level math has never been easier. From the author of "Mathematical Shenanigans" and the popular series "Great Formulas Explained".

Important note: to enjoy the book, you need solid prior knowledge in algebra and calculus. This means in particular being able to solve all kinds of equations, finding and interpreting derivatives, evaluating integrals as well as understanding the notation associated with these topics.

From reader reviews:

Linda Enders:

In this 21st millennium, people become competitive in every way. By being competitive at this point, people have do something to make these people survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Sure, by reading a publication your ability to survive boost then having chance to stay than other is high. For you who want to start reading a book, we give you this particular Math Shorts - Introduction to Differential Equations book as basic and daily reading book. Why, because this book is greater than just a book.

Catherine Hershey:

As people who live in often the modest era should be revise about what going on or data even knowledge to make all of them keep up with the era which can be always change and move ahead. Some of you maybe will update themselves by examining books. It is a good choice for you personally but the problems coming to you is you don't know what one you should start with. This Math Shorts - Introduction to Differential Equations is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

Ana Jimenez:

Now a day people who Living in the era exactly where everything reachable by connect with the internet and the resources inside can be true or not call for people to be aware of each facts they get. How people have to be smart in getting any information nowadays? Of course the correct answer is reading a book. Looking at a book can help men and women out of this uncertainty Information especially this Math Shorts - Introduction to Differential Equations book since this book offers you rich facts and knowledge. Of course the information in this book hundred pct guarantees there is no doubt in it you probably know this.

Charles Gray:

Spent a free time and energy to be fun activity to do! A lot of people spent their free time with their family, or their very own friends. Usually they doing activity like watching television, likely to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Can be reading a book might be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to attempt look for book, may be the publication untitled Math Shorts - Introduction to Differential Equations can be fine book to read. May be it could be best activity to you.
