Nursing Care: Surgical Patient, Musculoskeletal System, Cardiovascular and Respiratory System, Gastrointestinal and Urinary Systems, Sensory and Neurological Systems U.S. Army, Mindy J. Allport-Settle

The nation’s nursing shortage continues to have the potential to negatively impact the quality and safety of patient care both in civilian and military medical treatment facilities (MTF). Insufficient Army nursing capacity and in some cases low density specialties can threaten the viability of current and future AMEDD missions. The materials combined in this book provide complete, easily understandable, and well-planned learning tools for both military and civilian students. This Field Training Workbook is used as a quick reference manual for supportive care as well as guidance for the total skills competency required of medical personnel. In addition to providing the most concise information for consistent training and efficient learning, this text also provides guidance for diagnostics and self-testing. The United States Army is recognized internationally as the standard for complete, efficient and effective adult education. The Army has a tradition of pioneering training systems that then transition into the corporate civilian sector. This manual has been continuously tested and updated to successfully educate every member of the modern United States Army Medical Department (AMEDD). Included Documents and Features: - Nursing Care of the Surgical Patient 1. Preoperative Care of the Surgical Patient 2. Operating Room Care of the Surgical Patient 3. Recovery Room Care of the Surgical Patient 4. Postoperative Care of the Surgical Patient - Nursing Care Related to the Musculoskeletal System 1. Introduction to Orthopedic Nursing 2.
