Applications of X-ray Computed Tomography in the Geosciences (Geological Society Special Publication) (No. 215) Geological Society Publications
X-ray computed tomography (CT) is a technique that allows non-destructive imaging and quantification of internal features of objects. It was originally developed as a medical imaging technique, but it is now also becoming widely used for the study of materials in engineering and the geosciences. X-ray CT reveals differences in density and atomic composition and can therefore be used for the study of porosity, the relative distribution of contrasting solid phases and the penetration of injected solutions. As a non-destructive technique, it is ideally suited for monitoring of processes, such as the movement of solutions and the behaviour of materials under compression. Because large numbers of parallel two-dimensional cross-sections can be obtained, three-dimensional representations of selected features can be created. In this book, various applications of X-ray CT in the geosciences are illustrated by papers covering a wide range of disciplines, including petrology, soil science, petroleum geology, geomechanics and sedimentology.

Also available:

Mapping Hazardous Terrain using Remote Sensing - Special Publication no 283 - ISBN 1862392293
Geoinformatics: Data to Knowledge - GSA USPE397 - ISBN 9780813723976

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

-Petroleum geology
-Tectonics, structural geology and geodynamics
-Stratigraphy, sedimentology and paleontology
-Volcanology, magmatic studies and geochemistry
-Remote sensing
-History of geology
-Regional geology guides

From reader reviews:

Clyde Welch:

Have you spare time for the day? What do you do when you have considerably more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a wander, shopping, or went to the particular Mall. How about open or perhaps read a book titled Applications of X-ray Computed Tomography in the Geosciences (Geological Society Special Publication) (No. 215)? Maybe it is to be best activity for you. You understand beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have other opinion?

Joseph Kidwell:

In this 21st one hundred year, people become competitive in most way. By being competitive currently, people have do something to make these survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated it for a while is reading. Yes, by reading a book your ability to survive improve then having chance to stand up than other is high. For yourself who want to start reading any book, we give you that Applications of X-ray Computed Tomography in the Geosciences (Geological Society Special Publication) (No. 215) book as basic and daily reading book. Why, because this book is usually more than just a book.

Kelly Cruz:

The reserve with title Applications of X-ray Computed Tomography in the Geosciences (Geological Society Special Publication) (No. 215) has a lot of information that you can learn it. You can get a lot of gain after read this book. This particular book exist new know-how the information that exist in this reserve represented the condition of the world now. That is important to yo7u to know how the improvement of the world. This particular book will bring you inside new era of the globalization. You can read the e-book in your smart phone, so you can read this anywhere you want.

William Henslee:

Applications of X-ray Computed Tomography in the Geosciences (Geological Society Special Publication) (No. 215) can be one of your basic books that are good idea. We recommend that straight away because this guide has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining but still delivering the information. The copy writer giving his/her effort to place every word into pleasure arrangement in writing Applications of X-ray Computed Tomography in the Geosciences (Geological Society Special Publication) (No. 215) but doesn't forget the main position, giving the reader the hottest and also based confirm resource data that maybe you can be certainly one of it. This great information can drawn you into completely new stage of crucial contemplating.
