This book provides a new, powerful twist to MIDAS technical analysis, a trading method developed by the late Paul Levine. The authors show how to employ MIDAS in trading, from recognizing set ups to identifying price targets. The book explains the basics of MIDAS before demonstrating how to apply it in different time frames. Further, it extrapolates how MIDAS can be used with other more conventional indicators, such as DeMark or moving averages. In addition to introducing new indicators that the authors have created, the book also supplies new computer codes.
