Managing Environmental Disputes: Network Management as an Alternative (Environment & Management)

The concept of sustainable development is a source of inspiration for many, who see it as a call to cooperative action. In practice, however, policies intended to further this goal often generate conflicts of interest. The ensuing disputes occur among governmental organizations, but disputes also arise between public authorities, private interest groups, and the environmental movement. In the opinion of the authors, the fact that environmental policy can provoke such conflict may be attributed largely to decision making procedures in our society. Accordingly, the authors are convinced that a new approach to managing environmental disputes is needed in order to deal effectively with environmental problems. Indeed, this book presents a viable alternative, which is called network management.
